

Visual Analysis Capability Seminar 2009

25th March 2009

9am to 12pm

Registration from: 8.45am

Hong Kong Productivity Council, Lecture Theatre, 1st Floor

Visual Analysis Asia Limited is offering the opportunity for Analysts, Intelligence Officers and Investigators to attend the Visual Analysis Capability Seminar 2009 to see leading analytical technologies and intelligence methodologies and concepts. This event will showcase current and emerging i2 technologies via live demonstrations using the latest i2 software. The seminar will encompass a demonstration of the latest database integration options from i2 and will show the use of i2 tools in operational environments. The workshop will also be beneficial to those new in the analytical environment where a data intelligence expert will be presenting on intelligence methodologies and techniques used to quickly understand complex scenarios and volumes of seemingly unrelated data and how to perform analysis and communicate results. The seminar will also provide the opportunity for i2 users to network with other users from Hong Kong and abroad and ask questions from the i2 panel of experts regarding the i2 suite applications.

Accurate intelligence is vital to all operations and i2 tools coupled with the intelligence principles provides highly effective solutions to store, analyse and share intelligence. The i2 suite of products help to prevent vital information from being misinterpreted or lost. i2's visual analytical products aid the exchange of intelligence across forces by efficiently enhancing information sharing to combat local, regional and international threats. i2 software enhances the operational picture by combining disparate information into a common format, allowing information and intelligence to be shared globally.

This event is free to invited guests only and we welcome all our users from the Asia Pacific region and beyond to attend and take advantage of this opportunity to see the latest i2 tools and to meet the team from Visual Analysis in Hong Kong.

To register for our conference, please go to www.visualanalysis.com or email Xueni@visualanalysis.com

I look forward to meeting you at our seminar in Hong Kong.

Chris Coomber, Visual Analysis Asia
Vice President, Sales and Business Management

Agenda

08:45 Registration

09:15 - Opening and Introduction
09:20 *Stephen Brownhill, Group General Manager - Visual Analysis Asia*

09:20 - Value of Intelligence
09:50 *Chris Coomber, Vice President -Visual Analysis Asia*
The application of intelligence concepts and methodologies to construct and analyse interconnected information.

09:50 - Extending your application features with
10:20 Analyst's Notebook, iXv and iXa SDK
How Chee Mun, Senior Manager - Visual Analysis Asia
Overview on how *Analyst's Notebook, iXv* and *iXa SDK* can help to extend your current application features and improve the users experience.

10:20 - Coffee Break
10:50 Meet with expert presenters to find out more about i2 software

10:50 - i2 Connect - A bridge between relational
11:20 Database and Analyst's Notebook
Mex Yeung, Product Specialist -Visual Analysis Asia
The application of creating live connection between Oracle database and *i2 Analyst's Notebook* for advanced analysis.

11:20 - Showcase of iBase Unicode
11:30 *Chris Coomber, Vice President -Visual Analysis Asia*
A preview of how *iBase* can now store, search and retrieve data in Unicode format; storing information in its native form and improving data integrity for enhanced inter-agency working

11:30 - Closing Remarks
11:35 *Stephen Brownhill, Group General Manager - Visual Analysis Asia*

11:35 - Expert Panel
12:00 i2 and Visual Analysis experts answer your questions
