

Cyber Security China Summit 2011

March 24-25, 2011

Shanghai, China

Cyber crime now draws the global attention and calls for collaboration around the world. Not surprisingly in China the government, law enforcements and companies now are fighting the cyber crimes than ever. What form regulation of cybercrime on the Internet will take? Will it be effective through some international framework? How to achieve the cyber security through public-private partnership? These issues will be in our Counter e-crime China 2011.

Highlights include:

- **Hear from China police force on counter e-crimes updates**
- **Roadmap of global cooperation on fighting cyber crimes**
- **Cyber security insights in China: actions & strategy**
- **E-commerce security & cyber crimes in China**
- **WEB2.0 security**
- **Digital forensics practice against organized e-crime**
- **Evolving and advanced cyber attacks & cyber threats**
